# ICE THERMOMETER

What you will need:

Template

Scissors

Cardboard

Tape

Calliope mini

Stickers

Cord

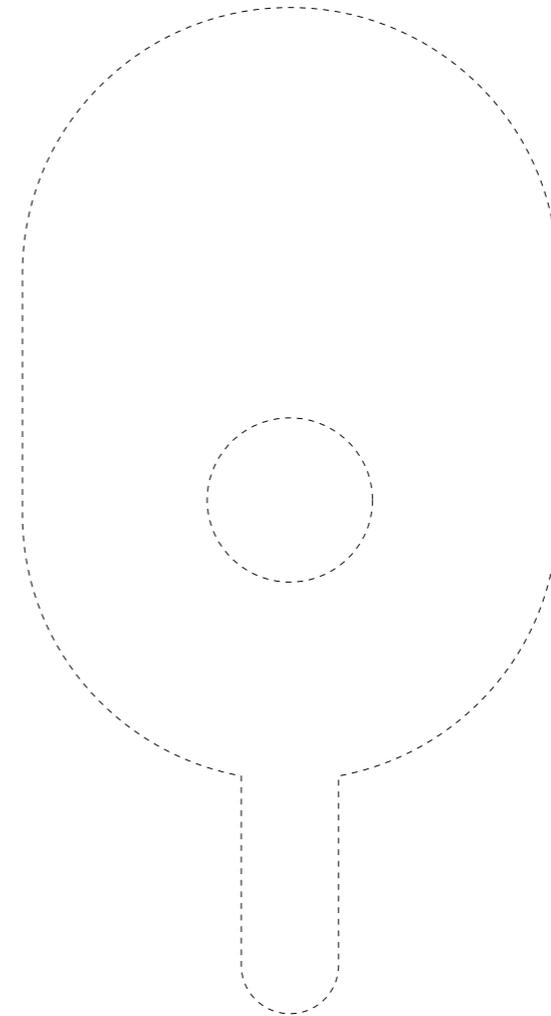

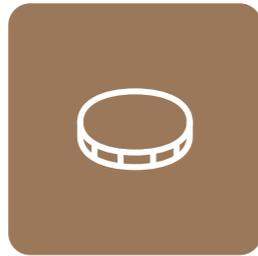

Batteries

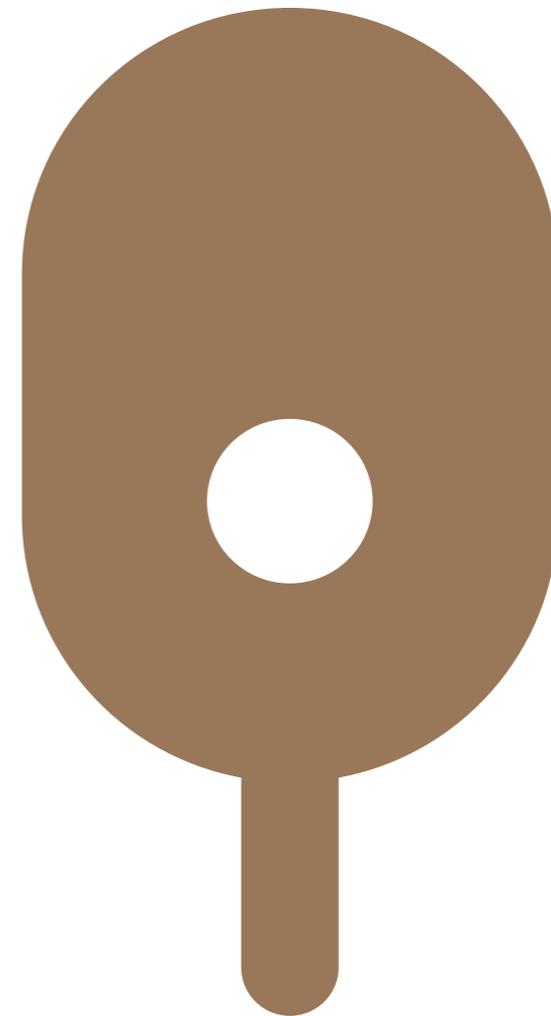

Cut the template.

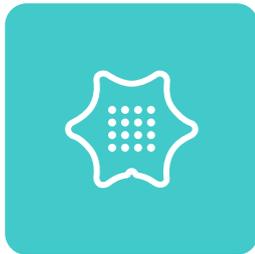

Be aware of the hole in the middle of the template.

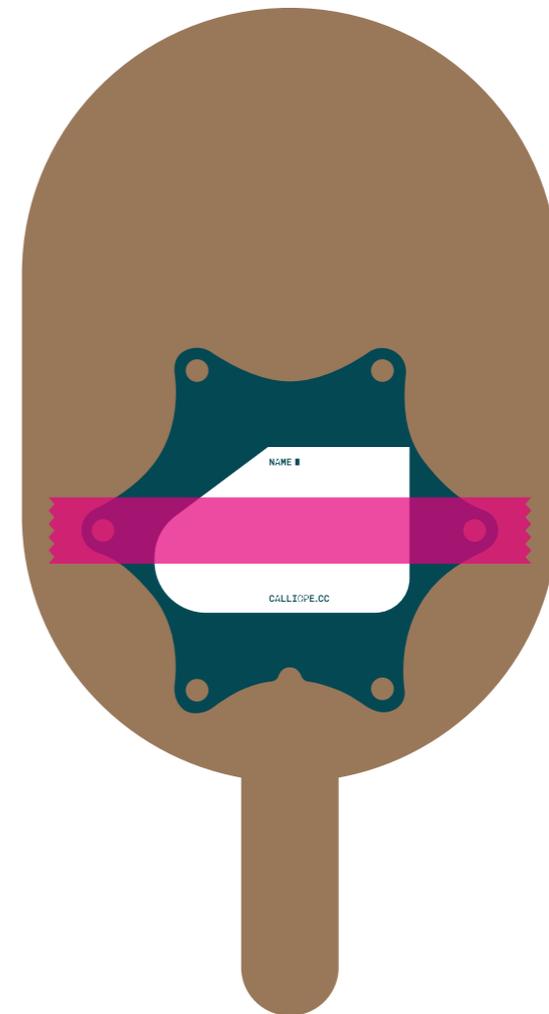

Trace the cut-out template on a cardboard and then cut the ice out of the cardboard.

Attach the Calliope mini with tape so that the LED display is visible through the hole.

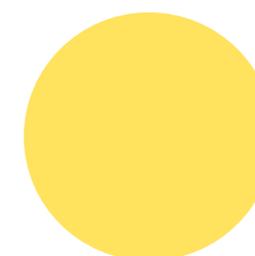

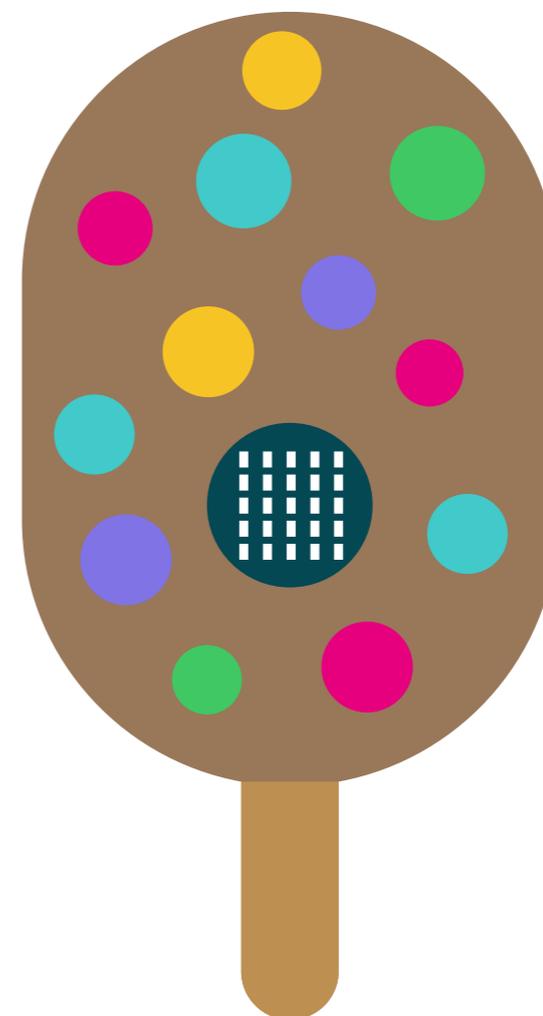

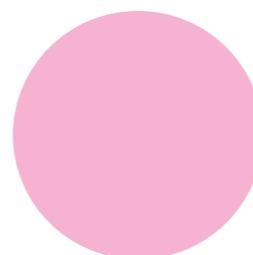

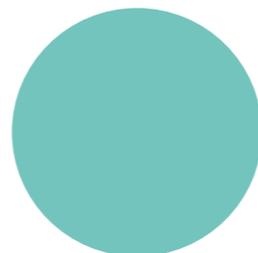

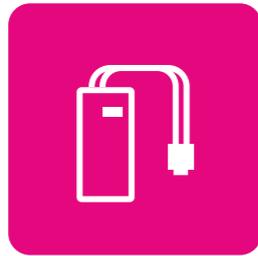

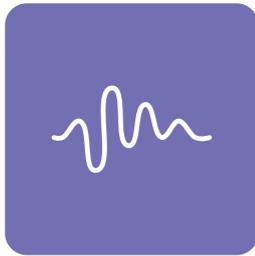

# ICE THERMOMETER

05

Decorate the front of your ice with colorful stickers or pens.

Form a short piece of string or cord into a loop and tape it to the back. Now you can easily hang up your ice.

Finally, connect the battery compartment to your Calliope mini.
