

Basic ways of activating Calliope mini

The mini can be activated with

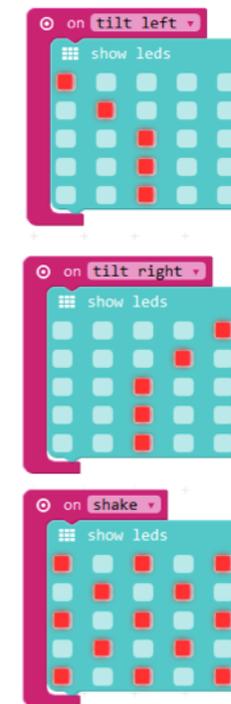

3 selectable button options...

...by rotating and turning over...

...or tilting and shaking.

Basic facts:

The command elements of the group [INPUT] have a selection field that is lighter in color. Here, further conditions can be selected by *clicking* on the arrow.

Materials required:

Calliope mini, PC, USB cable, battery pack

Prior knowledge required:

How to use an editor (pxt.calliope.cc)

Important notes:

In the programming environment, several conditions can be stipulated in parallel. A program can therefore specify several conditions.
